

I believe that the Telephone Consumer Protection Act was implemented at a great time. I worked as a telemarketer for a couple years and I hated my job. People would so mad when I would call them, so I think that it is a great idea for there to be a list of people not to call. I believe I would be on that list because I hate it when people call and try to sell me anything. If I wanted to buy something then I would go to the store and buy it, I would never buy something just because someone called and tried to sell me something I wouldn't trust them. As I have said I worked in the telemarketing field and I believe that the telemarketers would appreciate the list of people that would be really mean to them anyway. I believe that a federal list of numbers of people not to call for telemarketers should and will be implemented eventually. Keep up the good work and please try to push the federal list. Thanks.
